BEAUTÉ PACIFIQUE

Nourishing Shampoo for Normal/Dry Hair

200ml tube

Developed by Beauté Pacifique Dermatology, our Nourishing Shampoo is designed to be gentle on the scalp, with an effect on pH that is milder than water. The medical-grade formulation rinses easily and fights split ends without causing any irritation. It can be used daily, but should be used sparingly, mixed with water in your palms before applying, due to its concentrated formula. Massage the scalp gently to avoid mechanical irritation. The effective, low-foaming formula is made with the gentlest ingredients, making it suitable for all scalp conditions, including psoriasis, eczema, and dandruff. The light conditioning action leaves hair beautifully soft and manageable. This product is vegan and cruelty-free.

How it works

- A very mild tenside is one of the key ingredients in our complex formulation, which creates an extremely mild shampoo that gently removes dirt, oil, and other impurities from the hair by interfering with the pollutants' ability to adhere to the hair, therefore cleansing without stripping away natural oils.
- Restores the youthful shine and lustre of hair by replenishing lost lipids, preventing excessive dryness.
- Vegetable glycerin is a highly effective humectant (moisturiser) that can penetrate deeply into the epidermis and hair shaft, leaving hair and skin soft, supple, and smooth. It is especially beneficial for sensitive skin types, as it provides intense lubrication without being greasy. Vegetable glycerin is also extremely soothing to dry skin, helping to relieve itching and irritation.

Usage

- Pre-cleanse: Opens the hair cuticles and begins the process of gently breaking down and dissolving impurities. This prepares the hair for the vitamin infusion.
- Deep cleanse: Removes all dissolved impurities and leaves the hair strands detangled, clean, and fresh. The open cuticles allow the vitamins to penetrate the hair shaft, nourishing and strengthening it.

Vitamin Enriched | Anti-Thinning | Dermatology

Extended Performance Conditioner

200ml tube

Beauté Pacifique's medical-grade Extended Performance Conditioner is designed to improve the manageability of unruly hair, leaving it silky soft, healthy, and shiny. It is especially helpful for long hair and is suitable for all scalp conditions, including psoriasis, eczema, and dandruff. This vegan and cruelty-free product is made with gentle ingredients that nourish and protect the hair.

How it works

- Panthenol, a type of vitamin B, is a humectant that adds moisture to hair and protects against brittleness. It also helps to recreate the lipid shine of hair, inhibit split ends, and prevent excessive dryness. Vitamin B is important for hair growth because it plays a key role in producing red blood cells, which carry oxygen to the scalp so that hair follicles can generate new hair.
- Hydrolyzed wheat protein is a small molecule that can easily penetrate the hair shaft. It has been shown to add volume, shine, and strength to hair. It can also help to repair damaged hair.
- Tocopheryl acetate is a form of vitamin E that protects both the skin and hair from harmful free radicals. It is a powerful antioxidant that can help to prevent damage to the hair caused by UV radiation, pollution, and other environmental factors. Tocopheryl acetate can also help to improve hair growth by maintaining the health of the hair follicles and scalp.

Usage

- Apply the conditioner to your hair and massage it in. Leave it to work its magic for 10–15 minutes, then rinse it out thoroughly with warm water.

Volumizing Shampoo for Fine/Thinning Hair

200ml tube

Beauté Pacifique's Volumizing Shampoo has been developed to have an effect on pH that is milder than water, making it gentle on the scalp. The medical-grade formulation is designed to rinse easily, leaving hair with a natural, healthy gloss. This shampoo is gentle enough for even the most sensitive scalps. It helps to prevent dandruff and leaves hair feeling bouncy and full. This product is vegan and cruelty-free.

How it works

- A very mild tenside is one of the key ingredients in our complex formulation, which creates an extremely mild shampoo that gently removes dirt, oil, and other impurities from the hair by interfering with the pollutants' ability to adhere to the hair, therefore cleansing without stripping away natural oils.
- Cocoamide DEA recreates the lipid shine of hair and prevents excessive dryness.
- Panthenol is a water-soluble vitamin that is also known as vitamin B5. It is an effective moisturizer for hair and skin, and it can also help to prevent breakage and split ends. Vitamin B is also thought to promote hair growth by stimulating the production of red blood cells in the scalp.

Usage

- Pre-cleanse: Opens the hair cuticles and begins the process of gently breaking down and dissolving impurities. This prepares the hair for the vitamin infusion.
- Deep cleanse: Removes all dissolved impurities and leaves the hair strands detangled, clean, and fresh. The open cuticles allow the vitamins to penetrate the hair shaft, nourishing and strengthening it. Massage the scalp gently to avoid mechanical irritation.
- Highly concentrated, so use sparingly. Mix with water in your palms before applying to make it easier to spread evenly. The low foam is due to the selection of gentle ingredients.

Hydrating Hair Mask

200ml tube

Beauté Pacifique's Hydrating Hair Mask is a medical-grade hair treatment that is formulated to restore moisture and pH balance to dry and/or damaged hair and scalp. The formulation of caring ingredients rebuilds the natural defence of the hair. It nourishes and deeply moisturizes the hair, leaving it silky soft, detangled, and easy to comb. The mask also helps to improve elasticity and prevent split ends. The mask is vegan and cruelty-free.

How it works

- Macadamia Ternifolia Seed Oil is a natural oil extracted from macadamia nuts. It is a rich source of essential fatty acids, proteins, and vitamin E. These nutrients have a variety of benefits for hair, including: Strengthening and repairing, controlling frizz, hydrating and moisturizing, and protecting hair from free radicals.
- Panthenol, a type of vitamin B, is a humectant that adds moisture to hair and protects against brittleness. It also helps to recreate the lipid shine of hair, inhibit split ends, and prevent excessive dryness. Vitamin B also plays an important part in hair growth, enabling hair follicles to generate new hair.
- Tocopheryl acetate is a form of vitamin E that protects both the skin and hair from harmful free radicals. It is a powerful antioxidant that can help to prevent damage to the hair caused by UV radiation, pollution, and other environmental factors. It can also help improve hair growth by maintaining the health of the hair follicles and scalp.
- Silicone Quaternium-18 has a natural and gentle lubricating effect on the hair strands, making the hair soft and smooth. It can also add volume to the hair and it does not build up in the hair, due to its degradable nature.
- Beta Vulgaris (Beet) Root Extract is an extract of sugar beets. It improves the hair manageability and gives the hair heat protection abilities. It can also protect against fading in coloured hair.

Usage

- Distribute the Hydrating Hair Mask in clean hair and massage gently into your hair and scalp. Leave the treatment in for 10 minutes or longer, then rinse thoroughly. Use the hair treatment 1-2 times per week, or as needed.

RapidHair™ Intensive Anti-Thinning Hair Treatment Pack

50ml Leave-in Treatment pump + 200ml Volumizing Shampoo Dermatologically Tested & Consumer Approved

RapidHair™ Intensive Anti-Thinning Hair Treatment is a clinically proven leave-in formulation that helps bind nutrients into hair to revive its youthful, voluminous appearance in just 60 days*. Hair will appear fuller and thicker, with newfound strength and body. It is a breakthrough in deep conditioning, effective hair and scalp care for men and women. The treatment slows down or reverses hair thinning by nourishing and revitalising the hair and scalp.

How it works

RapidHair™ Anti Hair Loss Formula with Hexatein® 4 Complex is an exclusive nano-encapsulated blend of effective active ingredients, which includes the following:

- Polypeptides can increase hair follicle size and inhibits follicle death. Promotes fullness and volume.
- Biotin (Pro-vitamin B7 / Vitamin H / Coenzyme R) is an essential factor in maintaining beautiful, voluminous and strong-looking hair. Biotin helps stimulate keratin production and can increase the rate of follicular growth.
- Panthenol can protect hair from styling and environmental damage by sealing in moisture and preventing breakage. It can also help to slow down hair thinning.
- Pure silk amino acids help bind moisture into the hair shaft, leaving it soft, supple, and silky to the touch. They can also improve the resilience of hair, resulting in stronger-looking hair.
- Sweet almond extract provides a film-forming effect on the hair, smoothing the hair fibre and leaving it soft, shiny, and brilliant. It can also help to improve hair manageability and prevent dryness, flaking, and scalp tightness.
- Niacinamide (Vitamin B3) helps enhance moisture retention and invigorates the scalp while promoting the appearance of vitality and volume.

Usage

- Apply once daily, after washing and conditioning or directly onto clean, dry scalp, preferably before bedtime.
- Dispense two to three pumps of the product and massage briskly onto the scalp. For best results, use RapidHair™ for 8-12 weeks.

FREE Medical-Grade
Hair Volumizing Shampoo

*Scientifically tested and proven on 52 subjects over 60 days. 70% experience thicker, 72% fuller looking hair and 68% experience overall improvement in hair density and condition.

Medical Aesthetic Anti-Thinning Microneedling Hair Treatment

30 Minutes

Beauté Pacifique Medical takes hair loss seriously. We know that hair loss can be a frustrating and emotional experience, and we are committed to providing you with the best possible care. To enhance the results further of our clinically proven RapidHair™ Anti-Thinning Treatment Pack, we recommend incorporating in-clinic microneedling from your Aesthetic Professional.

Your treatment journey

Microneedling is a minimally invasive procedure that uses tiny needles to create micro-channels in the scalp. This helps to stimulate hair growth and improve the absorption of nutrients from the RapidHair™ treatment.

This scalp microneedling treatment drives the Hexatein Complex 4 comprising Polypeptides, Biotin, Panthenol, Silk Amino Acids, Sweet Almond Extract and Niacinamide into the scalp where true rejuvenation happens.

In as few as 60 days*, your hair will appear fuller and thicker, with newfound strength and body. It is a breakthrough in deep conditioning, effective hair and scalp care for men and women. The treatment effectively slows down or reverses hair thinning, helping hair grow faster and longer. It nourishes and revitalizes hair and scalp, reviving the appearance of hair's vivacious volume and brilliant, youthful beauty. The result is soft hair with brilliant sheen, enhanced resilience and volume.

If you are concerned about hair loss, please schedule a consultation with your Aesthetic Professional today and they will assist in creating a treatment plan that is right for you.

The result

Hair appears youthful and soft with brilliant sheen and enhanced resilience. Hair appears voluminous and is protected with effective anti-breakage ingredients.

*Scientifically tested and proven on 52 subjects over 60 days. 70% experience thicker, 72% fuller looking hair and 68% experience overall improvement in hair density and condition.

Healthy Eating for Happy Hair

Panthenol, a type of vitamin B, is a humectant that adds moisture to hair and protects against brittleness. It also helps to recreate the lipid shine of hair, inhibit split ends, and prevent excessive dryness. Vitamins play an important part in hair growth, producing red blood cells which carry oxygen to the scalp, enabling hair follicles to generate new hair.

There are eight B vitamins. One of them in particular, called Biotin or vitamin H, is widely promoted as an alternative treatment for hair loss. A healthy dose of Biotin is found in our RapidHair™ Leave-in Treatment kit and Defiance Collagen Evolved™ (Medical-Grade Collagen - Advanced Hydroxyproline Complex™). To help retain healthy hair, be mindful of including vitamin-rich foods in your daily eating plan. Some food sources of B complex vitamins include:

- Whole grains
- Vegetables, including dark, leafy greens
- Meat, such as beef liver and poultry
- Fish
- Whole eggs
- Beans and legumes
- Nuts
- Avocados

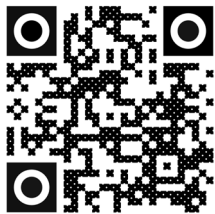

Tocopheryl acetate is a form of vitamin E that protects both the skin and hair from harmful free radicals, which can damage cells and lead to premature aging and hair loss. It is a powerful antioxidant that can help to prevent damage to the hair caused by UV radiation, pollution, and other environmental factors.

UVB radiation is responsible for hair protein loss, while UVA radiation is responsible for hair colour changes. When these types of radiation are absorbed by the hair, they can produce free radicals that damage the hair's proteins, especially keratin. This can lead to hair breakage, split ends, and premature greying. Tocopheryl acetate can help protect the hair from these free radicals. It can also help improve the hair's elasticity and strength, making it less likely to break or split. Additionally, tocopheryl acetate can help moisturise the hair and scalp, which can promote healthy hair growth.

To get enough vitamin E, it is beneficial to eat a diet rich in plant-based oils, nuts, seeds, fruits, & vegetables. Some good sources of vitamin E include:

- Wheat germ oil
- Sunflower, safflower, and soybean oil
- Sunflower seeds
- Almonds
- Peanuts, peanut butter
- Beet greens, collard greens, and spinach
- Pumpkin
- Red bell pepper
- Asparagus
- Mangoes
- Avocados
